

PRESS RELEASE

IMPULSA CIUDAD is a local Project born from Citizen participation. We as a group of local Citizens want to take a step forward to build **a new type of City**. We want to plant a seed for change which will grow to become our City of the future.

Our project aims at improving the quality of life in all aspects which are influenced by decisions from the Town Hall. For this reason we are taking a step forward to give new meaning to Politics called participation, adding to our projects the ideas of other citizens. We want to do this by forming a new electoral group in order to be able to present a candidate at the local elections in Marbella in May 2019.

We hope to win the trust of our neighbours so that we can plant this seed for it to grow and give us the fruits we need to convert our municipality into the City we all wish for.

IMPULSA CIUDAD is backed by committed people. The promoters of this group belong to various socially involved associations whose values and principle are foremost. They come from different professional fields so they understand the whole project from different points of view but share a common aim.

We have a project for Marbella of today and the future. We need the belief and commitment of all of the citizens who want to share this dream with us to transform the City from top to bottom. **A project from the People for the People.**

IMPULSA CIUDAD has a project for the City which we hope will capture all of your imaginations so that we can make Marbella a model city fulfilling the needs of all of its citizens.

Marbella, 12th November 2018

TENEMOS UN PLAN
